

To Whom It May Concern,

My husband and I are over the road truck drivers and as we drive across this great country there are many many areas that have no radio signal at all or very limited stations. Even when there are stations most don't last very long. As for the traffic and weather, we deffinatly need these stations to know when bad weather and heavy traffic are going to affect our delivery. Satellite radio provides variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.

Sincerely,
E. Marshall Downing
